

ULUF 750-2M

HIGHLY RELIABLE ULTRA LOW TEMPERATURE FREEZER WITH DOUBLE SECURITY

ULUF 750-2M ultra low temperature freezer comes with dual cooling technology that offers the highest level of security for your samples.

DUAL COOLING SYSTEM

DIRECT COOLING

FILTERLESS CONSTRUCTION

ULTIMATE SAMPLE PROTECTION

The dual cooling system is standard in the ULUF 750-2M, offering ultimate sample protection.

In the event of any failure on one of the cooling systems, the other system will still maintain an operating temperature of -70°C meaning your valuable samples at all times are stored with best possible security.

WORKING ENVIRONMENT

By placing the components on top of the freezer, there is never a compartment that you will have difficulties overlooking or using fully. Ensuring an ergonomically correct unit, which is easy and pleasant to use on a day-to-day basis.

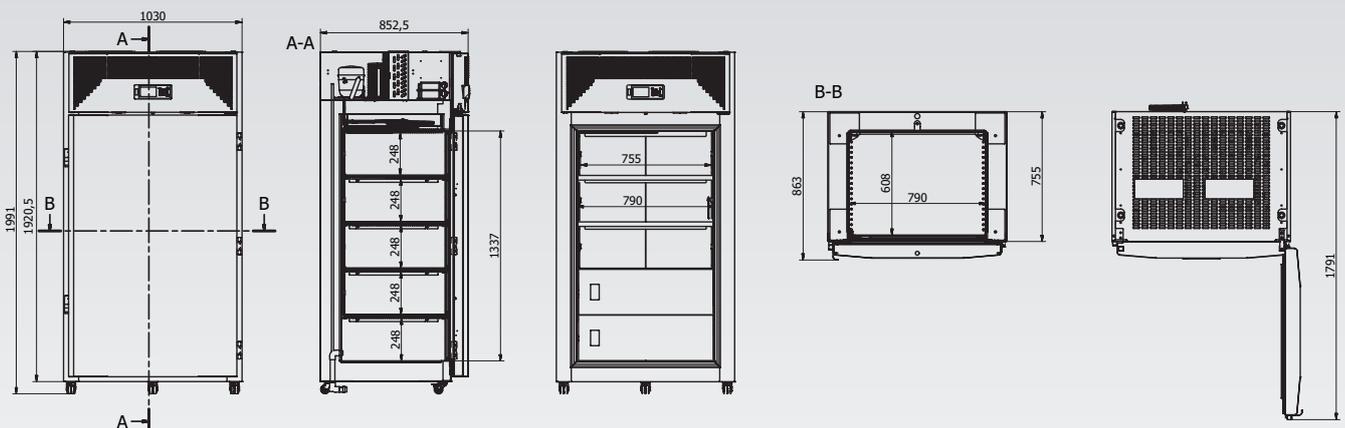

We are also able to reduce the noise level due to the placement of compressors and other heat - and noise generating components on top of the unit, ensuring a pleasant work environment.

FILTER LESS CONSTRUCTION

Our filter less construction makes cleaning unnecessary. The evaporator coils are spaced so far apart that dust will not be trapped and obstruct the airflow.

With our compressors located on the top, the dust intake is minimal this eliminating the need for filters entirely, saving you maintenance time and cost.
